The Digital Transformation Playbook: Rethink Your Business for the Digital Age

David L. Rogers

(Columbia Business School Publishing)

Rethink your business for the digital age.

Every business begun before the Internet now faces the same challenge: How to transform to compete in a digital economy?

Globally recognized digital expert David Rogers argues that digital transformation is not about updating your technology but about upgrading your strategic thinking. Based on Rogers's decade of research and teaching at Columbia Business School, and his consulting for businesses around the world, *The Digital Transformation Playbook* shows how pre-digital-era companies can reinvigorate their game plans and capture the new opportunities of the digital world.

Rogers shows why traditional businesses need to rethink their underlying assumptions in five domains of strategy—customers, competition, data, innovation, and value. He reveals how to harness customer networks, platforms, big data, rapid experimentation, and disruptive business models—and how to integrate these into your existing business and organization.

Rogers illustrates every strategy in this playbook with real-world case studies, from Google to GE, from Airbnb to the *New York Times*. With practical frameworks and nine step-by-step planning tools, he distills the lessons of today's greatest digital innovators and makes them usable for businesses at any stage.

Many books offer advice for digital start-ups, but *The Digital Transformation Playbook* is the first complete treatment of how legacy businesses can transform to thrive in the digital age. It is an indispensable guide for executives looking to take their firms to the next stage of profitable growth.

David Rogers is faculty director of Columbia Business School's executive education programs in Digital Business Strategy and Digital Marketing and founder of the BRITE (brands, innovation, and technology) conference. He advises global companies such as Google, GE, Toyota, Visa, China Eastern Airlines, Kohler, and Macmillan on digital strategy and has led strategic workshops for executives in hundreds of companies from 64 countries. His most recent book is *The Network Is Your Customer* (2011).
